

IN THE SPECIFICATION

Please amend paragraph 34 of the specification as follows:

[0034] In an attempt to overcome some of the concerns of burning candles, the inventors discovered and disclosed that coffee warmers could be used to heat candles. The coffee warmer warms the candle wax sufficiently to produce the desired aroma, but does not create a fire hazard. The use of a simple coffee warmer is not a preferred embodiment, however, because there is often no temperature control, and the candle may not fit the coffee warmer properly. Additionally, any contaminants which may be in the wick may leach into the candle wax.

The amendments to paragraph 34 reflect the understanding gained from the recent discussions with the inventors. A clean copy of paragraph 34 is presented as follows:

[0034] In an attempt to overcome some of the concerns of burning candles, the inventors discovered and disclosed that coffee warmers could be used to heat candles. The coffee warmer warms the candle wax sufficiently to produce the desired aroma, but does not create a fire hazard. The use of a simple coffee warmer is not a preferred embodiment, however, because there is often no temperature control, and the candle may not fit the coffee warmer properly. Additionally, any contaminants which may be in the wick may leach into the candle wax.
